**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3-4, 6-7, 9-10, and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Redeker et al., U.S. Patent 5,800,621 in view of Hama, U.S. Patent 5,716,451.

The rejection is maintained as stated in paper #5 mailed 6-19-00 for the reasons of record. In addition, the heater is capable of being controlled to provide deposition either on the substrate or on the walls of the chamber. Furthermore, the heater is also capable of heating the walls to the desired temperature range as claimed in claims 7, 9-10, and 12.

Claims 2, 5, 8, and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Redeker et al., U.S. Patent 5,800,621 in view of Hama et al., U.S. Patent 5,716,451 as applied to claims 1, 3-4, 6-7, 9-10, and 12 above, and further in view of Shang et al., U.S. Patent 6,055,927.

The rejection is maintained as stated in paper #5 mailed 6-19-00 for the reasons of record.

### ***Response to Arguments***

Applicant's arguments filed 10-19-00 have been fully considered but they are not persuasive. In response to applicant's arguments against the references individually (particularly the Hama reference at page 11), one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986). Applicant also argues additional process limitations which are not given patentable weight in apparatus claims.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
